WATERMAIN BREAK CLOSES TWO LANES ON PCH

MALIBU – The California Department of Transportation has closed one lane in each direction on Pacific Coast Highway (PCH) due to a break in the main and lateral waterlines at Big Rock.

The Los Angeles Department of Public Works is working around the clock to repair the waterline. At this time, it is expected that repaving will begin on Monday, December 4 with traffic lanes fully restored in time for the evening commute. Updates will be released should this timeline change.
